## DETAILED ACTION

### *Drawings*

1. The drawings were received on 7/5/2005. These drawings are acceptable.

### ***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance:

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 1, 4, and 7 are allowable over prior art of record.

Independent claim 1 is allowable since the claim recites an optical disk, irradiating means, light receiving means, and a wobble signal reproducing means, wherein the wobble signal reproducing means includes a detections means for detecting the center frequency of the wobble signal, which sends the signal through a band-pass filter then detects the frequency of the wobble after it has passed through the band pass filter. The closest prior art by Ohta (US Pat. No. 6,246,649) discloses an optical disk reproducing apparatus that contains a wobble signal detection means, a band-pass filter, and a demodulator (see Figures 1 and 4). Ohta does not disclose that the wobble signal center frequency detection means includes a band-pass filter followed by a frequency detection means.

Claims 4 and 7 are allowed as being dependent upon the aforementioned independent claim.
